# TossAway™

A dirty job made cleaner

Consumers are looking for solutions that help make their life easier. Tossaway provides an affordable and convenient way for consumers to address the vexing problem of plunger older and storage. Plunger docking stations are often thrown away after just of few uses as they quickly trap toilet debris and are hard to clean. Placing plungers on the floor produced unsanitary and unsightly bathroom stains. Developed by a medical products company the Tossaway was created to help hospitals and clinics contain disease-causing organisms commonly found in plunger docking stations and plungers. Now available to consumers the Tossaway provides an affordable and convenient way to store household plungers.

The TossAway™ system allows you to simply eliminate unsanitary toilet debris from ever getting on the bathroom floor, or even worse, from collecting into a germ-trapping plunger docking station. Cleaning up after your toilet plunger is disgusting and spreads germs. The TossAway™ system eliminates odor and frees you from ever cleaning up after a filthy toilet plunger again!

Stop trapping germs and embarrassing odor.

No more disgusting plunger rings on the floor.

Eliminate embarrassing odor with our “use-activated” room deodorizer.

## Why Tossaway

REFILL PADS RF200

COMPLETE KIT DS100

- Made in the USA addresses concerns regarding fair trade and US outsourcing
- Made from 100% recyclable material to address ecologically conscious consumers
- High-volume consumable drives consumption sales and store visits
- Flexible packaging design provides J-Hook or shelf merchandising
